A List of Books for the Course
"Algorithms for Molecular Biology"

- References [1, 2, 3, 4, 5] are introductory books in Molecular Biology.
- References [6, 7, 8, 9, 10] deal specifically with the Human Genome Project. Much more up-to-date material on the project is available on the web.
- References [11, 12, 13, 14, 15, 16, 17] are books on computer applications in Molecular Biology, with an emphasis on how to use software and interpret the results.
- References [18, 19, 20] present mathematical methods and algorithms and Molecular Biology.
- References [21, 22, 23, 24, 25, 26, 27] emphasize algorithmic approaches in molecular biology.
